Boston Marine Contracting Firm Declares Its Intention to Begin Work on Great Project.

### PLAN NEW SEA WALL

Approval of Scheme by the out the D. H. Burnham plans for an Secretary of War Gives an for Rushing Construction.

The approval just made by Secretary Boston, Cape Cod & New York Canal on June 22, by the supervisors, who thorof War Lickinson of the plans of the Company, which call for a sea-level cut between Massachusetts bay and the head of Buzzard's bay at Monument river,

The Alfred Sorenson Company, a Boston marine contracting firm, for some time has had a gang of men ready to ideal for a civic center, and build the go to work on the receipt of the neces- city hall on that, thus making it possible sary approval of the plans as they now in the future to carry out the Burnham stand. It was said today at the office plans. of this firm that ground would be broken

of jettles, the edging of approaches in tect, to direct and execute a plan for Barnstable and Buzzard's bay and the deposit of the excavated material. The approval of the department was based upon reports from the army engineers that no navigation interests will be adversely affected by the proposed canal.

The work will start at Sandwich,

where a big breakwater will be con-structed which will create a smooth surface cove on the Cape Cod bay coast which will be the entrance to the pro posed canal.

The proposed canal was first projected nearly 100 years ago by the early navigators of the Cape Cod coast, and at that time the reasons for the building of the canal were to afford a safe and gators of the Cape Cod coast, and at that time the reasons for the building of the canal were to afford a safe and smooth waterway from the ocean side of the cape through to Plymonth bay, from which Boston harbor cas be made without the necessity of encountering the heavy seas and unfavorable conditions which annually beset the coastwise traffic rounding Cape Cod. The canal would also cut hours in time from the schedule of Boston-bound craft from the South.

Wilbur and Orville Wright, the seroplane inventors, today by the national government, the state of Ohio and city of Dayton. Ten thousand people saw the presentation at the seconding day of the celebration in their honor. At the fair ground Brigadier-General James Allen presented the medals authorized by Congress.

Brig.-Gen. James Allen, chief signal officer of the army, at Dayton, O., in presenting medals to the Wright brothers, and:

The proposed canal will be 11 miles and:

"The history of the relations between thus will accommodate the largest ocean liners. The building of the breakwater,"

Wright brothers is as follows: liners. The building of the breakwater, which Captain Sorensen will commence this week, is considered absolutely easential to the success of the proposition because of the character of the soil. The entire cape is of fine sand, and without the breakwater, the engineers declare the project would be impossible. To make the matter sure the sea wall will be extended two miles and the banks of the canal will be lined with granite for aeveral hundred feet in from the Sand-wich end.

Wright brothers is as follows:

"On Dec. 23, 1907, specifications were issued as bids invited for a type of heavier-than-air flying machines. Among the awards made under these proposition was one to Orville and Wilbur Wright of Dayton, O., dated Feb. 28, 1908. So far as known this was the first public contract ever made by any government for aeronautical appliances of this kind.

"The general conditions under which the Wright machine was built for the wich end.

The graduating exercises of the class women received diplomas, were held to-day at 10 a. m. in the assembly room of

the school, at the corner of Newbury and Exeter streets.

The large hall was filled with an interested audience of relatives and friends of the graduates. Upon the stage were Principal George H. Bartlett of the institution, the Rev. Reuben Kidner of

The large hall was filled with an interested audience of relatives and friends of the graduates. Upon the stage were Principal George H. Bartlett of the institution, the Rev. Reuben Eldner of Trimity Church and Mrs. Kate Gamett Wells, who is chairman of the board of vinitors of the school.

The Rev. Mr. Kidner made the opening prayer, after which Principal Bartlett announced the following program of exercises, which was carried out: Easy, "Art as a Factor in Industrial Education," Harry Wallingford Jacobs; casey, "Designing a House," Chester Bradford Park; casey, "The Evolution of a Vane," Mice Alice Ercle Hunt; casey, "The Surgest of the Station of Painting," Mice Louisa Beate; cong. Alias Alice Christman Plisbury; valedictory, Mice Alice Ercle Hunt; casey, "The Surgest Except of the Station of the committee of the committee is the consultate will prepare the route of the scaner. This committee to the principal department of the accounting with the points of national of the school will give a reception to the accounting at the Hutsel Yealton.

The stages and friends by the members of the narroot, in the members of the harbor, and the opportunities for the development of the advantage of the harbor, and the opportunities for the development of the members of the harbor, and the committee and the maritime committee of the former Merchants' Association and after committee is the one which so successfully arranged the tour of New England last month. It is making a special study of the methods for the cartenion of trade. The maritime committee will prepare the route of the steamer. This committee to the principal committee of the former will be printed for the same of the members.

## San Francisco Plan for a "Civic Center," Regarded as Practically and Architecturally Ideal, Is to Be Voted Upon Next Tuesday

Comprehensive Design by Architect D. H. Burnham Calls for Expenditure of Over Eight Million Dollars.

### DIAGONAL ARTERIES

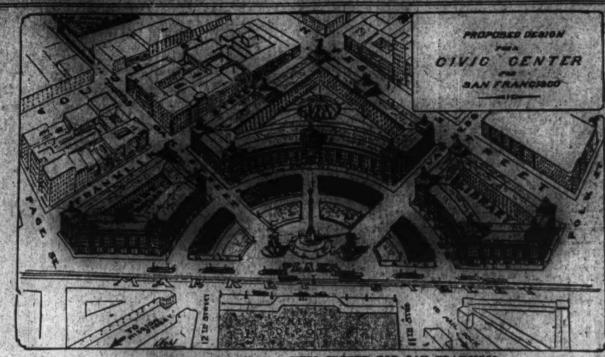

SAN FRANCISCO-A proposition reating to the first step toward carrying ideal San Francisco, consisting of acquiring land at the corner of Market street Impetus to Arrangements and Van Ness avenue, at a cost of \$4,-000,000, to be used for a civic center, on which a city hall shall be erected at a cost of about \$4,480,000, will be put before the people at a special bond election oughly indorse the plan.

The city hall, which was destroyed by the earthquake of 1906, has to be rebuilt of Buzzard's bay at Monument river, somewhere and the question that the means that the actual digging of the canal will begin immediately.

The Alfred Screnson Company, a Bos- whether the city shall sell this site and

day Points Out How the Monopolies Might Beat President Taft's Plan.

WASHINGTON-Senator Cummins of lows, whose income tax amendment ap-parently is destined to be side-tracked in favor of the Taft-Aldrich provision, pointed out today in an interview how the corporation tax might easily be

"The enactment of the proposed amend-ment," he said, "would for one thing probably result in the raising of the selaries of high officials of corporations who hold large block of stock, thus offsetting the amount of tax, chargable upon their dividends. Other: devices might easily be adopted. We rannot tell, for instance, how many corporations would be converted in partnerships in order to evade the tax.

Then, too, the practise might be dopted of converting stock into bonded adebtedness. The interest on bonds ust be paid before there can be any net earnings' upon which to levy the proposed 2 per cent tax. Andrew Carnegie solds bonds of the United States Steel Corporation to the value of \$350,000,000 and the money earned to pay the interest on that large amount would not be

subject to the proposed tax.

"As matters stand now, however, it is not possible to make a definite statement as to the effects of the tax. The extent to which the small investor will be affected will depend upon the manner in which the amendment is framed." Some senators declare that the impo-

## Protest Moving Swampscott Shaft

Memorial at Burrill and Humphrey streets which it is proposed to place on the Mudge estate to afford more room for traffic.

SWAMPSCOTT, Mass .- Patriotic men so that the congestion is great at times

SWAMPSCOTT, Mass.—Patriotic men and women of this town who are opposed to sacrificing the present attractive appearance of the soldiers' monument for the sake of minimizing the congestion of modern means of transportation have thus far succeeded in holding their ground and in continuing the famous old granite shaft on its original site. Public concern in the proposed removal of the monument and the surrounding park opened for travel. Soldiers of Bates post, G. A. R., are among the remonding the famous old granite shaft on its original site. Public concern in the proposed removal of the monument has not shated, however, and there is yet a possibility of the memorial being transferred to other surroundings.

The monument at present occupies a beautifully kept reservation at the junction of Burrill and Humphrey streets and the road leading to the Mudge estate overlooking Massachusetts bay. It is a familiar roadmark to autoists of the North and South shores, standing as it does at the entrance to one of the greatest bollward drives in the world, and the Boaton & Northern makes it the terminus of many of its main line cars. The square itself is limited in area and the amount of travel through it has increased.

So that the congestion is great at times, big pack of the value of the will be sent to have the will be sent 17 times a distance of 395 miles, in the race for the Cobe cup.

### FRUIT CROP IS VERY PROMISING

Western Canada Peninsular Section Has Bright Prospects Ahead-Transportation Poor for Fruit Men.

NIAGARA, Ont.—The fruit crop of the western Ontario peninsula, from Niagara to Sarnia and almost as far north as Lake Simcoe, promises to be so successful this season that the Fruit Growers Association is busy devising means to extend the market for both fresh fruit and the canned product. The canneries are more than usually busy with even the rhubarb crop, which has been particularly fine this year.

For the fresh small fruits the problem is one of transportation, the Ontario and Montreal markéts seeming to afford at present the distance limit for the carrying of these perishable fruits.

Cherries were successfully carried to Winnipeg last year but strawberries did not at and the test. The fruit acreage of the peninsula has increased 7 per cent auova that of last year.

Boston Loses to St. Louis, While Chicago Wins Very Close Contest From the Brooklyn Team.

### OTHERS POSTPONED

Chicago won a close game from Brooklyn summary follows:
3 to 2. The others were postponed.

### BOSTON ALMOST WINS AGAIN.

BOSTON ALMOST WINS AGAIN.

ST. LOUIS, Mo. — Boston lost the game here Thursday when they apparently had it. A mixup in the seventh resulted in the home team scoring two runs and putting them in the lead with one run. A double play in the fourth prevented the visitors from winning the game in that inning. The score:

Innings ...... 123456789 R.H.B. 

### DULL GAME AT CHICAGO.

CHICAGO-The locals won a dull and CHICAGO—The locals won a dull and listless game Thursday, enlivened only by Brooklyn's bunching of syo-base hits and the two triples by Evers. Poor base running by both teams lost chances for scoring and two of the visitors' errors helped Chicago to two runs. The

Innings...... 123456789 R.H.E. Chicago...... 00102000 —3 7 3 Brooklyn..... 0200000000—2 7 3 Batteries, Brown and Moran; Hunter and Berger. Umpires, Johnston and Cusack.

## GOLF FIXTURES

The Commonwealth Country Club an nounces the following golf fixtures for the autumn mouths: Monday morning, Sept. 6, open handicap medal play, net prizes for classes A and B; afternoon, mixed foursomes, best gross and net ntrance fee \$1; 15, women's fall cup, qualifying round handicap medal play; prizes for the best net score; 18, qualifying round for the Thernton cup, best 32 net scores to qualify for handicap row over the four-mile course late.

Thanksgiving Day tournament.

For the remainder of June and the month of July the following four fixtures are scheduled: June 19, qualifying round for the Albert E. Smith cup. This cup, which has to be won twice to gain

permanent possession, was won in 1907 by E. W. Baker and in 1908 by P. C.

secution Has the Mos Successful Auto Races Ever Held Here.

READVILLE—Triving at a speed of 56 3-5 seconds a mile on the Resdville track Thursday, Raiph De Palma in a 50-horsepower Fiat car, made a new world's record for 25 miles, the finish flag being dropped 23m. and 35s. after it had been waved for the start. De Palma's new record displaces the mark of 23m. 38 3-5s., made by Barney Oldfield at Freeno, Cel., Dec. 13, 1904.

In a previous attempt to break the world's one-mile record, De Palma negotiated the circuit in 54s on the accord trial, equalling the Readville track record, but three seconds behind the world's mark.

the world's mark.

The races were part of the annual Bunker Hill day meeting of the Bay State Automobile Association, and eight races were run off, it being the most successful meet ever held in this vicinity. In no other contest was record time ap-

James B. Ryall of New York entered Philadelphia at Cincinnati.

Only two games were played in the National league Thursday, St. Louis defeating Boston by a score of 4 to 3, while Chicago wore a line game from Brooklyn.

summary follows:

For Bailey trophy (five miles; for stock cars driven by amateurs)—Won by B. W. Shaw. Boston, in Stoddard-Dayton car; second, A. W. Merriam, Boston, in Welch car; third, James B. Ryali, New York. in Buick car, Time 5m, 25s.

Special match race at five miles—Won by Harry F. Grant, Boston, in Aleo car; second, Hugh Hughes. New York, in Allen-Kingston car. Time 5m, 6 1-5s.

For touring cars (36 horsepower and under, at five miles)—Won by E. O. Hayes, Boston, in Midland car. Time, 6m, 4 3-5s.

For storinged stock cars over 36 horsepower—Won by L. B. Lorimer, Worcester, in Chaimers-Detroit car; B. W. Shaw, Boston, second, fh. Stoddard, Dayton car; Hugh Hughes, New York, third, in Allen-Kingston car, Time 9m, 46 1-5s.

For stock car roadsters or runabouts up to 30 horsepower (three miles)—Won by John J. Coffey, Hartford, Coan, in Columbia car; second, F. F. Cameron, Worcester, in Chaimers-Detroit car. Time 3m, 38s.

For stock car roadsters or runabouts (31 horsepower and over, at five miles)—Won by S. L. Rogers, New York, in Welch car; C. A. Glenworth, Boston, second, in Allen-Kingston car; F. F. Cameron, Worcester, third, in Chaimers-Detroit car. Time 5m, 16s.

Open, to all (25 miles)—Won by Raiph D. Delive in Five and the story of the car. Time 5m, 16s.

om, 16s.

Open to all (25 miles)—Won by Raiph
De Palma in Fiat car; L. B. Lorimer, Worcester, second, in Chalmers-Detroit car;
Charles Basie, third, in Bulck car. Time,
23m. 35s.

FINE PLAYING IN **OPENING ROUND** 

P. W. Whittemore Has the Lowest Card of Eighty-Three Starters in the State Golf Championship Meet.

The first round of match play in the fassachusetts state golf championship ournament was played this morning on he links of the Oakley Country Club. As six of those who qualified Thurse withdrew, all those who scored \$7 better are in the match contests. Greatly handicapped by condition

better are in the match contasts.

Greatly handicapped by conditions, some excellent golf was witnessed at the first match game of the Massachusetta state championships on the Gakley Country Club links this morning. All those was qualified Thursday started.

The first to get a way at illicitodick was J. G. Anderson, Woodland, against W. E. Stiles of Brae Burn, being followed at 10:05 by Champion T. R. Füller and J. W. Coe. A. G. Lockwood, Allston, former champion, and R. W. Brown of Masdow-brook were the last to leave, attring at 11:12.

Crocker beat C. Zuehlin, 1 up (19

of 74 for 18 holes. It was the best score made in the first day's play of any state championship. Out in 40 and home in 34, Whittemore finished three better than ing score: bogey. Whittemore played great golf, leading his nearest competitor, A. L.

White, by three strokes.

Anderson and Loekwood, former state hampions, who qualified with scores of 78 and 80, respectively, are expected to meet this afternoon in the second round, unless there is a most decided upset in the first round matches. They both are at the very bottom of the lower division of the draw, while Fuller, the present champion, is at the top of the first half

of the draw.

Four 6s on the homeward journey spoiled warhop and Kielnow. Umpires, O'Longh-tin and Kerin.

There are other matters sorely required in an extension of the powers of the Cougress beyond the rigid limits set to the constitution of 1789.

The suppress court is bount in honor and conscience to strictly upbold the literal interpretation of the constitution of the rigid to give other meanings to that instrument than the ones intended by the makers. Therefore, if we are to have uniform laws throughout the country upon such vital matters as federal supervision and regulation of insurances, which the supervision and regulation of insurances of merchandize descent an inheritance of property and such other matters now within the superato and exclusive jurisdictions of the many elates, the people must be willing to amend the federal constitution. The final decision upon the whole field to supervision and campaign of education upon the whole field of government by constitution and let us realize that not all constitutions are written ones.

## SUMMER SCHOOL

Classes in Nine Courses Start Five Hours a Week for While the oaks, and particularly the Nearly Two Months.

Summer school work at the Massachusetts Institute of Technology legan this morning with classes in nine courses. The subjects to be taken up this sum-mer are mathematics, mechanics, drawing freehand and mechanical), descriptive geometry, mechanic arts, English, modern languages, chemistry, physics, civil en-gineering, mechanical engineering, archi-tecture and biology.

mens of her work were recently exhibited in Philadelphia, Pa.

The superiority of the work by Misa to Peters' process is unquestionable, as it yes and elearness of the negative, but also has softness of its own that makes the pictures extremely attractive.

Summers of the own that makes the pictures extremely attractive of her method is that the pictures are made permanent by reason of their being covered by the enamel that is inacparable from the tile. The subjects she exhibited were varied and included an exceptionally fine medallion of Martin Luther, German market scenes and numerous interior and exterior views. One of the latter, a view of the ferenatic of a site philadelphis North American. The introcessile is shown, and beneath that a portion of the main deck. Se sharp is the work that ropes and small objects has are clearly depicted, although the picture is a ministure.

### DEWEY'S SUPPLY STEAMER IS SOLD

SEATTLE, Wash.-According to eport at the Bremerton navy yard, the merchant steamship Zafiro, which was purchased by Admiral Dewey from British owners prior to the battle of cholarship in the College of Liberal Manila bay, in order to get coal to carry him through the engagement, has been sold to junk dealers for \$3000.

We Are Taking Advance Orders on High-Grade Furs and Fur Coats

In Such Desirable and Fashionable Furs as

Genuine Alaska Seal, Copper Island Seal (London Dye guaranteed), Cape Horn Seal, Hudson Bay Seal (Fine Selected Skins), Persian Lamb, Black Caracul, Genuine Pony Skins, in All Styles, Qualities and Lengths

ALSO AN EXCELLENT SHOWING OF COATS IN MINK, ENG-LISH SABLE, JAP MINK, MARMOT AND SABLE SQUIRREL SPECIAL PROVISION BEING MADE TO FURNISH THE MOST SUITABLE AND CORRECT GARMENTS FOR AUTOMOBILING

THIS EARLY SHOWING IS EDUCATIONAL, EXHIBITING THE PROPER MODES FOR THE LATE FALL OF 1909 AND WINTER OF 1910

The Reasons "For this advance offering are many and all in the customers' favor. You very well know of your own good reasoning that to wait until wanted means a higher price. Last winter was mild, consequently at the present time Furs can be arranged for at extremely favorable rates. You can also understand the desire of fur-workers to keep busy, even at a fraction of the prevailing winter wages.

> With the above conditions favorable to prospective purchasers, we wish to add for your convenience in payment the following plan: We will not require cash or the usual 30 days prompt payment of charge customers, but will accept one-third cash from those who do not have accounts, the balance being payable October 1. Regular charge customers will not receive bills until the 1st of October.

Another Inducement Offered Is Free Storage on Purchases Until Garments Are Wanted

WEWISH YOU TO UNDERSTAND CLEARLY that you can now select any model and have a canvas fitting made and fitted satisfactorily before garments go into the workrooms.

In addition to the above assortment of Fur Coats, we are showing Men's and Women's Fur-Lined Coats, in all the new colors nd styles to be worn next season. Also beautiful styles in Natural Mink, American Sable Furs - Scarfs, Throws, Ties, Muffs, etc. The "Advance Sale" prices are very tempting, too

Our System of Cold Storage Is the Best to Be Found in Boston, and Our Price for Protection and Preservation Is But 3 Per Cent of a Fair Valuation.

Repairing and Remodeling During the Summer Season at Very Low Price

Great Britain. June 30 Great Britain.

The nomination of M. Sazoroff as under secretary of state for foreign affairs gives a proof that M. Stolypin is trying to turn Russia's foreign policy into another channel. The meeting of the monarchs was most

cordial. The German Emperor gave a on Wednesday of next week and then to dinner Thursday evening on board the Hohensollern, his guests including the Russian Emperor and Empress and their respective suites.

## London's Foreign Office

LONDON—The foreign office today saked for a detailed report from Captain Bobertson of the British steamship Woodburn, which was fired upon by a Russian torpede boat Wednesday night near the bay of Pitkipas, where the Czar and the Kaiser are now having a meeting. The ewners of the vessel, Whitefield & Co. of Newcastle, have received a telegram from Captain Robertson, dated

nese War.

### OUTING IS HELD BY ODD FELLOWS

LYNN, Mass.—More than 2000 Odd Fellows gathered at Point of Pines Thursday in attendance on the annual field day of the combined lodges of Cambridge and Lynn. The program included two baseball games, a number of running races and dancing.

PROVIDENCE, R. L.-The timed advocated by Councilman Makepeng and buyer for several fruit importers in Englisher members of the committee on East land, writes from London to Ren H. Miss Side thoroughfare is not satisfactory to secretary and manager of the National the New Haven railroad officials, and Vice-President Buckland of the railroad Spokane early in December to buy for Vice-President Buckland of the rathrons company, it is expected, will state the objections at today's meeting of the expectal Risko, western Montana and

The plan provides for a tunnel through the basement of the Rhode Island School of Design, and the railroad company also is invited to build and pay for the tunnel and then, upon request by the city, to transfer it to the city and take a long lease, the terms of which require the payment of the interest on municipal bonds and enough more to cre-ate a sinking fund to take up the bonds

Vice-President Buckland said Thurs day that the proposition made by the committee to President Mellen had been referred to him and he had no hesitation in expressing his dissatisfaction with the plan as presented. He said he had no desire to send electric cars under the School of Design, which he regarded as one of the most useful insti-tutions in the state, and he believed that some other location would afford facili-ties just as good and at much less ex-

penditure. .

The plan now presented, continued Mr. Buckland, was discussed a year or two ago. The company then considered it the most costly, because it cuts through valuable property—the market at the corner of North Main and Waterman, the School of Design and residences between the School of Design and Benefit street.

The damages would be very heavy. The committee agreed with our views and proposed locating the tracks just north craft and skill along the river and lake locality. Inside the quaint stone and log of Waterman, at the side of the church-shores and on the mountain sides the structure there is on exhibition a curious yard, where there are no buildings and where damages will be limited to the cost collection of relics of Indian and pioneer of the land.

> This plan was agreed to by the committee and the company, but later the committee wanted us to tunnel under Canal street to avoid the churchyard and we decided to drop the subject as the committee did not seem disposed to stand by its agreement. A tunnel alone will not furnish all the

thing besides street car traffic, and I only 1/2 of 1 per cent of the gross earn-

facilities needed by the East Side, con-

Boston, Hass.

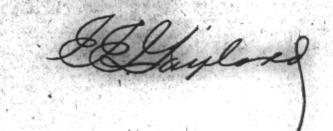

I cannot forego the pleasure of expressing to you the interest and satisfaction I have had as I have sto-In time from day to day to keep in touch with your ex-cellent journal. I like its intelligent, concise, closely-knit, well-written editorials, particularly those touching on foreign topics. I like, too, the emphasis in your have columns laid on educational topics, on social, economic, and political matters representing progress in the life of the world and in the things that are worth while.

I am gled to observe your reiteration of the desirability of applying the Golden Rule.

It is a great relief to see pictures of good things, things that minister to comfort, peace, happiness, represented in your photographs, rather than the haggard faces of orime-chased and suffering humanity.

You are on the right track, and winatever may be the basic motive of this particular publication or the institution that backs it, it appears to me that only good can some in the long run, and good, too, in its widest reach, infinitely beyond the possibility of any of us to realise at this time.

Yours sincerely,

denly aroused virtuous abhorrence of its methods is amusing. Every time the government has had a chance to enforce the criminal provisions of the law-which constitute the only effective part, the others being mainly

academic-it has run. We all know that the anti-trust law is being openly flaunted and violated every day by some of the most powerful men in the land. There are operating in this city today numberless secret, unlawful pools to control prices and restrict production, many of them under written agreements that are criminal conspiracies on their face.

Somehow or other it looks as if the power of these men is too much for the government. The evidence of crimes has been for years available to the publie authorities if they would go about their task as they do in ferreting out smugglers, counterfeiters, postoffice thieves, and other classes of criminals.

Until the public mind is aroused to recognition of the extent of the evils far greater dangers that are threatening summoned here. Mr. Wise left for New us, it is useless to attempt to bridg York late Tuesday afternoon, immediathese men within the law. Their power is so great that they are practically ference.

easily led. The sugar trust is no ting just about the sort of administra-

Counsel for the seven former employees of the sugar trust who have been indicted in connection with the the prospect of a criminal prosecution of the sugar trust. Being asked whether his client was a sugar weighing frauds on the Have-meyer & Elder piers in Brooklyn are endeavoring to get Henry I. whether his client was going to try the special counsel retained by the government to prosecute the sugar cases, to consent to a postponement of their trial on the ground that at present the public mind is too much stirred up by the recent settlement of the Pennsyl vania Sugar Refining Company's \$30,-000,000 suit and its attendant developments to make it possible for these defendants to have a fair trial. The trial has been set down for tomorrow before Judge Holt in the United States ircuit court.

WASHINGTON-United States District Attorney Henry A. Wise of New ney-General Wickersham, and it is believed that they went over the sugar trust investigation, since Mr. Wickersham has been devoting most of his time for the last week to a close study of a mass of documentary evidence in con-nection with the case.

The supposition is that the department legal machinery in New York to deduce further evidence, in the collection of which two special agents of the departognition of the extent of the evils the department declined to discuss Mr. which we are suffering, and the Wise's visit or to admit that he was

Fluctuations Rather Violent and Much Energy Is Put Forth by Bears to Send the Quotations to Lower Level.

### BOSTON STOCKS OFF

Encouraged by yesterday's weak market, the bears made a further raid upon New York securities today. Prices generally were firm at the opening and during the first sales there were some good gains throughout the list, especially among the railroads. After the demand, which was largely due to shorts cover-ing, was satisfied stocks yielded again and the reaction carried prices down a point or more below the opening.

ospects, but it seemed difficult to dis-higher at 81%, but when the bears got after it this morning it dropped under 80 on short notice. American Smelting was also attacked, After opening up 1/2 at 91 it fell back 1% to 89%.

Wabash preferred opened unchanged at 6714, rose to 58 and then sold down to 56%. Union Pacific at 190% was up 16. at the opening and advanced fractionally. Reading opened up 1/8 at 151% and dropped a point. Later it sold up to 152. Toward midday there was some brisk buying and stocks recovered almost as quickly as they had declined.

Among the strongest of the list was New York Central, which opened up 1/2 Union Pact at 134%, and after selling down to 132% U 8 Rubbe rapidly advanced above 133. American U 8 Steel... pressure in the early trading and advanced over 2 points after opening at 43% Central Leather moved up nearly 2 points to 32%.

The local market was heavy during the early transactions. Utah Consolidated was off a point at 42%. Copper Range at 81 was off 1/2 at the opening and dropped a point more during the Shannon reacted from 16 to 151/2 during the first hour. Arizona Commercial opened off a point at 401/2 and 660 to 655. North Butte opened off a point at 57 and declined another point.

The New York market held up well for the greater part of the afternoon, U 8 Steel 5s ... .. with the New York traction stocks making good advances. Atchison also was strong, advancing 1 1/2 over the opening. The local market gained a little strength

### REPORT MADE ON STOCK EXCHANGES

The report of the committee appointed by Governor Hughes to investigate stock exchange methods, makes several sug-gestions for reforms, but does not con-demn the methods of the various exchanges in general.

The report states that the stock ex-change itself should cure what evils exist voluntarily, and the committee recommends that no margins of less than 20 per cent be accepted; also that the unlisted department be done away

Short selling is regarded as necessary and desirable as a part of the business of the exchanges. The curb market should be regulated by exchange authorities. The report favors the revocation of the charters of the mercantile and metal exchanges.

### GOOD INCREASE IN NET EARNINGS

The Baltimore & Ohio Railroad Company's statement of earnings and ex-penses (exclusive of outside operations) for the month of May, 1909, as compared with May, 1908, shows gross earnings, 1909, \$5,931,066; 1908, \$5,092,494; increase \$838,572. Expenses, 1909, \$4,127, 081; 1906, \$4,014,044; increase, \$113,037. Net carnings, 1909, \$1,809,985; 1908, \$1,078,450; increase, \$725,535.

For the 11 months of the fiscal year, as compared with the same period of 1008.

1908, the statement shows gross earnings, 1909, \$64,831,438; 1908, \$68,172,530; decrease, \$3,341,092. Expenses, 1900, \$43,336,011; 1908, \$50,264,014; decrease, \$6,926,003. Net earnings, 1909, \$21,493,-427; 1906; \$17,908,516; increase, \$3,584,-

### ERIE RAILROAD TO ISSUE BONDS

ALBANY, N. Y .- The Eric Railroad

ALBANY, N. Y.—The Eric Railroad Company has applied to the second district public service commission for sutherity to issue bonds amounting to \$1,000,000 under its first concolidated morigage deed dated Dec. 10, 1805.

Under the terms of the morigage, the company is entitled to issue at this time \$1,000,000 per value of general lies bonds. The proceeds are to be used for general purposes. A hearing has been appointed for next Wednesday.

### STEEL FURNACES ARE TRANSFERRED

PITTSBURG-An interesting rearrangement of steel plants in Pittaburg territory has been made by the United States Steel Corporation through the formal transfer by the Carnegie Steel Company of the two big blast furnaces and 12 open-hearth steel furnaces at morning with fares as follows in pounds:
Donors to the American Steel & Wire Metamora 32,000, Robert and Arthur 32, Donors to the American Steel & Wire Company. In exchange, the Carnegie Company takes over the Neville furnace that was built by the American Steel & Wire Company on Neville island, and also the Edith furnace, in the Woods Run district. The changes were made by formal transfers of property to the different companies, but in reality this has little significance as they are all United States Steel properties. Howard, it places the Carnegie Steel Company in the Month of the Carnegie Steel Company of the Carnegie Costa 38,000, Mary E. Silveira 10,000, Louise Cabral 10,000, Phillip P. ### MARKET NEWS

NEW YORK—Subpoenss have been issed for Receiver George H. Earle of the ennsylvania. Sugar Refining Company, his counsel and all the witnesses in the brought by him to appear before the United States grand jury in this city. The government seeks to have the trust indicted for violation of the Sherman anti-trust act, and it is understood that the case is set by the grand jury for Monday.

PITTSBURG-The Crucible Steel Company reports net earnings for the quar-ter ended May 31 last of \$556,343, against \$555,823 in the previous quarter and \$411,213 in the quarter ended Nov. 30, 1908. The total net earnings for the nine months ended May 31, 1908, were \$1,-523,380, equal to 8 per cent on the pre-ferred stock. This is \$1,813,492 greater than for the same period in the previous year, when a deficit was shown.

NEW YORK-It is understood that the has been secured by the Illinois Central an early date. Railroad Company. President Harahan of the Illinois Central has left this city for the West to arrange for the physical transfer of the property. The Central of Georgia railway was organized in October, 1895, and on Nov. 1 succeeded to the properties of the Central Railroad & Banking Company of Georgia, foreclosed. The company owns and operates about 1400 miles of railroad, leases about 500 miles and also owns the Ocean Steamship Company with a mileage estimated at 300 miles on the average.

In the opinion of Ferdinand Dupont, the French banker through whose efforts the stock of the United States Rubber Company and of the Utah Copper Company secured admission to the coulisse of the Paris bourse, there can be no doubt that eventually the stock of the doubt that eventually the stock of the 26% United States Steel Corporation will be listed in the French exchange.

"The mistake that has been made," 1% said he, "was in announcing as an accomplished fact what in reality had but into the treasury of the United States Steel Corporation.

### SHIPPING NEWS

A fretful porcupine was captured by two of the crew of the fishing schooner Monarch, Captain Vantier, on her last trip to Cape Shore. The porcupine was captured while awimning around a lobster pot, some eight miles from the entrance to Halifax harbor. Its quills were waterlogged, and although it tried to fight the two fishermen and had thrown its quills at them, its ammunition was too wet to do much execution.

## FOR FUTURE COAL

Jones & Laughlin of Pitts burg Close Deal for New Mines to Supply the Wants of Steel Company.

PITTSBURG, Ps. Jones & Laugh 34,000,000 in cash, in asticipation of years of heavy steel making, though the coal lands will not be developed for years. President B. F. Jones explained the big outlay as necessary "because it is desirable for the future coal supply of the steel company. The new tract is contiguous to coal land already owned and will be held in reserve."

The Spang-Chalfant mills of Pittsburg report the booking of pipe orders in June up to date of 100,000 tons, which is a greater record than that of any whole month heretofore. Specifications were ordered Thursday for a new pipe mill to be rushed, since the present mills cannot handle the business.

### BIG INCREASE IN INQUIRY FOR CARS

The Iron Trade Review says: The principal development of the week is the heavy increase of inquiry for cars and improved prospects of heavy buying by the railroads. If declared, the strike against the establishing of the open shop in the plants of the American Sheet & Tin Plate Company will no doubt be stubbornly fought.

Cotton for the 11 months ended with May, 1909, shows a fall of about \$20,000,000 in the value compared with the corresponding months of the preceding year. This fall is entirely due to lower prices, the quality of cotton exported in the 11 months ended with May being \$24,000,000 pounds more than in the stubbornly fought.

for 35,000 cars for all lines east and west, year. and the B. & O. has completed its finan-cial arrangements and will receive bids in \$29,000,000, flour \$11,000,000 and corn on from 8000 to 10,000 cars. The Harri-30,000,000 for the 11 months ended with man lines have received figures on 4300
freight cars. American Car & Foundry
has received a contract for 2250 freight
cars from the Western Pacific, the Chiin 1909 than in 1908, and the fall is for 1000 cars, and the Northern Pacific quantity exported. for 2000 cars. It is expected that orders Beef cattle, fresh beeves, manufac-

Amount to Two Hundred Million Dollars

Figures for the last II mouths of the ported in 1908 was \$1,835,000.000, fit 1907 11,854,000,000 and in 1906 \$1,718,000, these figures being in round terms.

The causes of this marked decline ar practically those which have produced similar conditions in other parts of the world—a reduction in the general demand for merchandise and a material reduction in the prices of certain of the more

important articles exported.

The principal articles in which the falling off in our own exports occurs are cotton, corn, wheat, meats, manufactures of iron and steel, manufactures of copper

### The Roses Are Here

Thrice welcome the roses, the feast the roses, The queen of the seasons, the pride of

When the question is lately put to them I find no men who deep this propriation of the equality of the warse No one would expect to design an inferior to the father, where the mother were taught to fook upon the half or the women to be sure even of one another's names and faces. Therefore about a year ago a club was formed by wives of senators and representative.

The sum of the proposition of the quality of the warse No one would expect to design an inferior to the father, where the children were taught to fook upon the high where the mother was reported as an inferior being. Spiritual equality must be admitted before there can be perfect cooperation. As the perfect cooperation. As the perfect cooperation. As the perfect cooperation of the father, while were taught to make an inferior or the father were taught to fook upon the chilary mark be admitted before there can be perfect cooperation. As the perfect cooperation. As the perfect cooperation. As the perfect cooperation of the father was united with Sardina. It is now of course part will ever be a just government for refreshment. The Calestials have a make a hasis for a permanent organization. The famous old Bistchford mansion in the heart of the most fashionable part of are rooms for dasees, receptions and lec.

## The City of Christopher Columbus

"Genoa the Superb" (or proud) has its
first interest for Americans in that it
was the city of Christopher Columns.
Its consection with us might have been
even closer and the course of history
quite changed, had the fathers of the
republic been able or willing to grant
the explorer the ships he saked for be
fore Spain fitted him out. Americans," was
a native of Florence.

Hence-is also memorable as a port
from which thousands of children

PORTA VACCA, GENOA.
Part of the old fortifications of the city.

which permit a glimpse of Spain and Tangier, and then again at Naples one may stay over, resuming the Mediter-raneau trip and reaching Genos in an-other day's journey.

Almost the first object of interest after

fortifications of 1155. The Via del Campo, or field, into which it leads is now a busy city thoroughfare. Once the traveler came out there into the narrow green plain that lay between the sea and the hills, which here as at Naples rise so close to the water that the cities and towns climb steeply from the water's edge.

### Women's Wages in England

In a letter to the Times, Mrs. Arncliffs-Sennett, writing as a working partmer in a business in which women are
mainly employed, says: "In a country
where something like \$,000,000 women
are employed in mills and factories it
would mean nothing short of ruin all
round to proportionately raise women's
wages to the level of man's earnings at
one fell sweep, especially in a country
open to foreign competition.

"My point, as a suffragist, is this, that
with political emancipation the status of
the woman will be reissed. With her improved status her recommic value will
rise, so that in process of time there will
come a more equitable balance of justice
between the man laborer and the woman
laborer, who, though a woman, will be
'worthy of her hire.'" In a letter to the Times, Mrs. Arn-

### Russia's Chancellor Dr. Hale and Boston Streets

Daniel Decatur Emmett, who formerly resided in Mount Vernon, O., returned there after an absence of 50 years, and their form of entertainment was the writer had seen this picturesque old the writer had seen this picturesque old man walking with a tall staff, a heavy minattelsy.

The title "Chanseller of the Russian Empire" was first instituted 200 years ago, and after a special ministry for foreign affairs was created 200 years and streets of a tow's named Trimountain, or Trement, should run around the curves of the hills which give it its name! It would have defied its name and history if the determinant weather wished they were in "Dixie" was written while Emmett the cliffs on the aides of them for office of chancellor is to be revived after office of chancellor of the Russian Empire" was first instituted 200 years ago, and after a special ministry for foreign affairs was created the sentence it was from some circuis men who during unseasonable would have defied its name and history if it had cut straight trenches through highest, but unique rank in the empire; had office of chancellor is to be revived after office of chancellor is to be revived

## Children's Department

### "I Choose That Color"

"Yes, ma'am; I'd like a gown of that blue color." "Won't you come under my umbrella!" I said. She looked down at A game which most children know very her wet dress suddenly, as if it had not well was being played one day by a occurred to her before that it was rainlittle girl who stood all alone in the ing. Then she drew first one little foot and then the other out of the muddy puddle in which she had been standing. Hunt Jackson noticed her. She wore an old plaid shawl and a ragged knit hood of searlet worsted. Dropa of water of searlet worsted. Dropa of water ma'am. I'd like to stay here a while." old plaid shawl and a ragged knit hood of searlet worsted. Drops of water trickled down her neck from the hood, but still she stood, apparently pointing with her finger at articles inside the window. Mrs. Jackson says:

I stole up behind her. The window was full of artificial flowers of the cheap-

st sort, but of very gay colors. Here and there a knot of lace or ribbon had seen added, and the whole effect was very pretty. Tap, tap, tap, went the small hand against the window pane, and with every tap the unconscious little creature marmured, in a half-singing, half-whispering voice, "I choose that color." "I choose that color." "I choose

Prayer supports the poor, con-trols the rich, sustains the weak,

strengthens those who are uncer-tain and protects them, who stand firmly. Prayer is the fortress of

faith, the panoply of the combatant, and the power against the enemies

who always beset our way. Let us

never go out without having on this armor.—Tertulian (150 A. D.)

The order, Louis Fotter, was grad-nated from Trinity College, Hartford, 1998, and studied Both painting and scripture abroad. As a popil of Maunter and Redin, he kepan as an extreme realist, but his later work is marked by an imaginative and postical quality, which has broadened its scope and given it the force and appeal of expressed truth. Mr. Potter is looked upon as an artist of bright promise.

A wonderful piece of sculpture has been put on exhibition in New York re- The portrayal in stone of this lesson cently. It is entitled "Earth Bound" and of human affliction brings home to each and every one who looks upon it the need

almost too heavy to bear. This sculptured group most eloquently tells the story of human needs and cares.

"Earth Bound" as One Writer Sees It

The younger man in the group appears to be leaning toward the woman to help her steady her burden in addition to earrying his own. The child carries no burden, but seems to be bowing in anticipation of that which is to come. The aged man is more heavily weighed down than the others.

cently. It is entitled "Earth Bound" and is described as showing three generations, of looking upward and not downward of looking upward and not downward if we would discard our weight of care and we. The appearance of this notable piece of work and the interest it arouses is a significant sign that sculpture is breaking away from conventional themes and the art of the molder is being used to awaken greater mental activity in the to awaken greater mental activity in the direction of teaching metaphysical truths. Many will look upon this work in marble to realize as never before the futility of groping about for the light where only the darkness of materiality can be found.

Imperial
Meetings

Pitkipas Bay has just witnessed a historic event, the meeting between Kaiser and Czar. It was marked by an incident not contemplated in the program but nevertheless characteristic of Russian imperial journeyings; the adventure of the British steamer fired upon by a Russian torpedo boat brings home the vigilance of those commissioned to protect the Czar. From any other point of view, that incident never happened. Its only plausible effect might be that the regret of it served as a further manifestation of friendship between England and Russia. There has been a great change in the valuation of this meeting of Czar and Kaiser since it was first announced. It is no longer thought of as a damper on the Czar's subsequent visit to France and England; certain dispositions and certain semi-official hints have reduced its scope to the cultivation of good relations between the two empires. scope to the cultivation of good relations between the two empires

It would be idle to minimize the importance of the Czar's cruise from the Baltic to the Mediterranean. The tacitum Emperor who has emerged from one of the most gigantic revolutionary upheavals of modern times as a more truly powerful ruler than any of
his absolutist predecessors has shown himself ito possess clearly
defined views and aims which he pursues in a quiet, sober way. The
forthcoming cruise will be as momentous as it will be unostentatious.

It is decided that King Edward will not meet Francis Joseph
this year as in the past. But compensation is offered the world in

this year as in the past. But compensation is offered the world in the report that the Kaiser will visit England in the autumn and that he proposes sojourning on the Cornish coast. This year's program of royal and imperial visits exceeds in scope and interest even that which ended in the establishment of the triple entente. Some of the visits are already past. They were, however, more spectacular than fruitful. The great Kaiser festival of Vienna has had no more lasting effect than the Austro-German triumph which oc-casioned it. The German Emperor's meeting with King Victor failed to cement the triple alliance and in the light of subsequent events if might seem that King Edward had been more successful in Naples than his nephew in Brindisi. A conspicuous success had at one time been ascribed to the diplomacy of the Kaiser's son. His complimentary visit to the Hohenzollern who is seated on the throne of Roumania was believed to have resulted in the amplification of the Austro-Roumania military convention to a formal alliance between Roumania and the powers of the Dreibund. But the quadruple alliance is not yet.

One thing is characteristic above all else of this year's meetings: unlike those in past years, they take place not before but after the storm. This bids fair for the world's peace.

W. R. COOPER, an observant Englishman, who has given much time and thought to the subject, recently, read a paper before the Royal Automobile Club of London, in which he discussed the dust-producing propensities of different types of automobiles. This paper was accompanied by drawings illustrating the points brought forward by its author, and the devices used on the front and rear of e direction of the air currents

As to the Dustless Motor Car

produced. The Motor World reprints the paper, with illustrations, and declares that "manufacturers should adopt any changes in their own designs tending toward the abatement of what is, frankly speaking, a public nuisance."

It may be taken for granted that if devices are offered which ve promise of freeing motor-car travel from the discomfort attending the raising of dust, the makers of the machines will lose no time n adopting them. Mr. Cooper seems to have conceived a plan which, when fully developed, will go far toward abating the dust nuisance. His theory is that if the motion of the car causes the air currents to flow down they will disturb the air near the surface of the ground, and if the currents are sent up behind the car they will carry this layer of air charged with dust. He maintains that the car should be run so as to leave the air practically undisturbed within six inches of the ground, and he recommends feasible modifications of the mud guards, the tanks, the car frames, and also the setting of the machine frame a suitable distance from the ground. These are details for the mechanic, and if Mr. Cooper has hit upon the right idea they will be quickly worked out.

Even though it be true that the dust problem may be best settled by the use of top dressings for roads which will resist the air currents and the suction of the tires, it will nevertheless be well to provide, if possible, for some relief from the nuisance in the interval which may elapse before we shall have dustless highways.

The Back Yard Viewand the Better View

An interesting writer in the Outlook, Ella Bond Johnston, touches on a subject which must at one time or another have presented itself to all men and women of average observation and taste. The matter was forced upon the attention of this lady, it seems, when she was visiting a "big city of the middle West" and was taking in the view from the back window of the residence in which she was being entertained.

While she was looking at the shed kitchens, and pondering upon the front door, back door, parlor, kitchen architecture which seems an inevitable expression of our civilized effort to house ourselves com-fortably, her hostess entered the room and asked what she found so very absorbing from the back window, and then we have this

I replied that I was meditating on a curious phase of human na-ture that keeps men forever doing things the same old way, although there is no longer any need for it, or common sense in clinging to the old

method.

She brightened at once with interest, being a wide-awake woman.

"Well, what is it?" she asked.

"Tell me," I replied, "why the backs of all the houses opposite are so inferior to the fronts. I noticed when we were passing on the street yesterday that the fronts were quite substantial and attractive in appearance, and now this view shows such inferior design, workmanship and materials. Could there be anything more uninteresting and forlors than that row of back doors!"

While this brings up, so the writer goes on to say, "an over-ming picture of the failure of man to nest himself comfortably."

simply and beautifully ... and it is the tragedy of civilization that he has failed so signally in solving it," let us regard it, rather, as a triumph of civilization that he is succeeding, if slowly yet against tremendous odds, in bringing the problem within measurable reach of solution. Unless we at times look back over the road upon which tremendous odds, in bringing the problem within measurable reach of solution. Unless we at times look back over the road upon which we are journeying we cannot form a fair estimate of the difficulties we have surmounted or the progress we have made. It is too true that there may still be found in our cities and towns veritable deserts of monotonous wearness, and that beauty in our day continues to pause too often at the village outskirts; but it is equally true that the modern city, town and village are vastly more attractive than the city, town and village of a half century ago.

Moreover, men and women in great number, with great disregard for their own time, leisure and comfort, with great civic pride and with great love of the beautiful, are transforming the very scenes to which the Outlook writer refers. As a result of a few years' faithful work on the part of municipal art leagues and backlot societies, there are great districts in all of the big cities of the country today. East as well as West, which are laid out and built up, and kept up, with regard to the elimination of back-yard ugliness.

Although an immense amount of work must be done among the mansions, apartments and truement houses before anything bordering on ideal conditions can be reached, there is nothing in the situation or the prospect that is hopeless. On the contrary, seeing that people are becoming more and more discontented with the bare, the desolate, and the ugly, and more and more attracted by the things that are bright and beautiful, there is all cause for encouragement.

bright and beautiful, there is all cause for encouragement.

Policing the Caribbean FROM Central America public attention has once more shifted to the south. Venezuela and Colombia are claiming it. They both seem to be the object of enterprising gen-tlemen who in the romantic age would have been ealled filibusters.

Actual news about their movements is extremely vague, but it is fairly certain that the position of President Gomez of Venezuela and that of President Reyes of Colombia

calls for vigilance on the part of the American authorities. President Reyes is reported to have started on a journey to which the tripartite treaty between Colombia, Panama and the United States is apparently not foreign. The President is believed to be a friend of American progress and policy in the Caribbean and recent reports of suspicious movements near Colon observed by the Panama authorities could not leave Washington indifferent. A number of Colombian exiles who passed through the isthmus some time ago and are now in Ecuador, made some interesting statements on the subject of President Reyes' dilemma, which is apparently destined to bring matters to head and settle Colombian affairs in a way that will guarantee order in that important corner. It is patent that as Colombia's neighbor this country is bound to help her authorities toward that end.

Venezuela finds it harder to throw off Castro's influence than she had expected. A man of his strenuous temperament will take his time to subside, and he may never quite relinquish his old ambitions. Senor Paul's sudden disqualification by the Venezuelan Congress was an unexpected epilogue; his appeal for American naval assistance during the crisis was considered humiliating to his country and sufficient reason for his immediate recall from Europe where he had, apparently, pursued a successful policy of conciliation. The incident does not affect the relations between the two countries, but being a new development it encourages watchfulness. Up to the present reports concerning the return of order and prosperity in Venezuela have been truly satisfactory, and whatever be the plausible or unplausible explanations of certain ships in certain roads, interference with the status quo in Venezuela cannot be countenanced. The renovation of Caribbean politics has begun in earnest. It is inseparable from the digging of the Panama canal.

Two \$50 gold pieces coined at the Philadelphia mint in 1877 have been sold for \$10,000 each because they are the only coins of the kind in existence. Is there not a hint here for those who would avoid the tax on inheritances, the tax on dividends or the tax on incomes as a means of providing for the deficit? There is evidently a biz profit in the coinage of rare coins.

Reports that American capitalists are looking over the ground near Edmonton, Alberta, for the purpose of establishing shoe factories need not alarm the manufacturers of Massachusetts, inasmuch as the demand in western Canada, in spite of the rapid settlement of the country, will hardly call for a very large product compared, for instance, to what the shoe factories of the city of Lynn, Mass.,

Shoe Manufacture in the Northwest

shoe factories of the city of Lynn, Mass., are accustomed to put out each year. In fact, it will take many years before any single section can withdraw its patronage from this section of the country and be felt to any appreciable extent. The city of Lynn is credited with having produced \$00,000,000 pairs of shoes last year. This makes it the largest shoe-producing city in the world.

Not only in quantity but in quality does Lynn excel. The help employed is of the most skilful kind, and any advantage in freight rate and lower taxes which western cities could offer in competition for the location of factories in their midst is more than balanced in favor of Lynn as a superior location for factories. The city has taken many advanced steps in providing for the comfort and education of those who labor in the trades of that city. The city now proposes to establish an industrial school for training men and women in all beanches of the those business. Its graduates will be fitted to occur proposes to establish an industrial school for training men and women in all beanches of the those business. Its graduates will be fitted to occur proposes and most skilffully; and in view of the superiority of the Lynn graduat it is hardly likely that competition will depicte its factories.

Profin everywhere are being affected with what might be called the brighter, busier, better diction of 1815 Boston. For instance, the class president predicts "a shapeher, sightlier, statelier Simmona." And there is no doubt at all as to a larger, loftier, lovelier Tufts, and a handsomer, higher, heftier Harvard.

Awong the many other things which will contribute toward making life in the country more enjoyable hereafter will be the occasional landing of airships in the cow lot.

Turkish public opinion, it is safe to say, will not cease because it is proposed to suppress all news unfavorable to the government.

FROM ALL ACCOUNTS New Mexico is striving hard and successfully to overcome at least one of the arguments raised against her admission into the sisterhood of states. A resident of the territory for the last twenty-five years has just put into writing his testi-mony that a vast improvement has taken place there in the last few years, and that this improvement promises to continue until in the matter of education New Mexico will

Progress of Education in New Mexico

be able to bear comparison with any of the western states. This writer found, when he first became a resident of the territory, that the natives were content to plow with a crooked stick drawn by a cow; that they were content to scratch the ground two or three inches deep with the furrows a foot or more apart, that the native children had no schools, and that the native parents were utterly indifferent on this point. Now, he tells us, there are common schools all over the territory. There is a territorial university, an agricultural college, a normal university and a normal school.

It is pleasing to find these and other statements made in this connection fully supported by the latest official statistics. From these it appears that New Mexico during the last decade has made truly wonderful progress in every particular, and in no way more strikingly than in the matter of popular education. Although the progress of educational work has been somewhat hampered by the presence of two languages in general use, the last report made by the Governor on the subject must be regarded as highly satisfactory. Of the 80,000 children of school age in the territory, 50,000 were enrolled in the public schools. Several thousand were also enrolled in other schools. The total number of teachers was 1000, the value of school property was \$1,000,000, and the annual cost of the schools was \$539,964.

The satisfying thing is that the progress made in education in New Mexico during the last quarter of a century is greater than was made during the preceding three hundred years.

The Burdens of Armament

IF THE average man could be brought to see that money recklessly spent for armor and battleships means so much in the line of extra labor; so much added to the cost of necessities, he would be less likely to glory in the fact that battleships make an imposing sight and warriors an inspiring parade. Ac-cording to the chairman of the committee on appropriations in our House of Representa-

tives, the United States spends more than half its national income in the support of the army and navy and the equipment and maintenance of defenses, plus the expenditures on account of past wars. The enormous revenue required to support this service called for a total last year of nearly \$385,000,000.

Our expenditures for military purposes and for the results of war are greater proportionally than those of any other nation in the world, and if it were not for the conservative element in Congress, these figures would be even larger. As it is, the constant effort to increase appropriations along this line saddles our treasury with expenditures far in excess of the combined moneys appropriated for many of the other important functions of the government. According to this authority, "We seem to have proceeded upon the theory that all our nation demands or expects is the building of the biggest battleships, in order to gratify a boyish ambition to have something other nations do not possess; or we have proceeded upon the theory that the mere building of these great fighting machines would have the effect of affording protection by scaring the other fellow."

The practical value of this, aside from the disciplining effect of battleships used in policing the waters adjacent to our territory, is hard to discover. It is quite evident, however, that reduced to a practical basis, this expenditure means additional taxation upon the nation. Nevertheless, if this weight of taxation is needed in order to speed the hour when the nations of the earth will one and all disarm, it can be borne without complaint.

ONE of the Boston papers considered it an item of sufficient interest to its readers to mention, a few days ago, that the first horse of the season wearing a straw sunshade had appeared on the streets, adding that the other horses seemed to look with interest on this appearance. Whether the sunshade helps or hinders the horse, it is an interesting token of the owner's interest in the animal and illustrates the care which many owners be-

Consideration for the Horse

stow on their horses, especially at the approach of warm weather. The automobile has not yet emancipated the horse, and in our anxiety to improve the former, let us not forget our duty to the latter. Horses cannot complain, yet they render good return in work for all they receive. It is humane, to say the least, to provide for the horse's needs. A neighboring city last year introduced a plan worthy of emulation. It provided two or three pails at each of the fire hydrants in the busiest portions of the city, with an attachment by which water could be turned on to supply thirsty horses. Needless to say, this act was appreciated both by the drivers and the animals.

A little kindness and consideration not only benefits the horse but the driver as well. The practise of allowing a horse to stand for hours with a feed-bag tied to his nose; the carelessness which permits a horse to stand in the sun when he might just as well be left standing in the shade; the absence of a cool bath, which can be given with but little trouble—all these things denote the unthinking, unappreciative, or unjust driver. It would be well for all who have in charge the welfare of horses to give them more consideration, especially at this season of the year. The horse is dependent on our kindness for fair freatment, and food and shelter is not all we owe

It is possible, of course, that the failure of Congress to settle the tariff question earlier accounts for the tremendous crowds attending the ball games here and elsewhere this season. People have got to be doing something.

As a MATTER of fact, all the friends of the Lakes-to-Gulf deep waterway wanted to know was whether it was feasible. The army engineers say it is feasible but not desirable, which is going out of their way and their province.

THE supreme court of Ohio has decided that a hen is a chicken. This seems a trifle arbitrary, but it serves to show what power is vested in the judiciary. No Legislature would declare a hen a chicken without some qualifications.
